I worked with Charlie for 3 years at Pneubotics and later Canvas Construction as the lead electrical engineer and he was a software engineer there. We worked on the same robot systems and most of my projects I did not work directly with him but was at weekly meetings with him.

I did sometimes debug with Charlie and sometimes he struggles to systematically troubleshoot problems. And sometimes he struggles to communicate things, in certain projects he might have overcomplicated things or aimed for the simplest solutions.

Charlie is good at showing not telling about his work and visualization information. He also seems like he can work with most people well and not break things. He seems good at delivering on things on time.
